

TYPES OF

Powder Applications

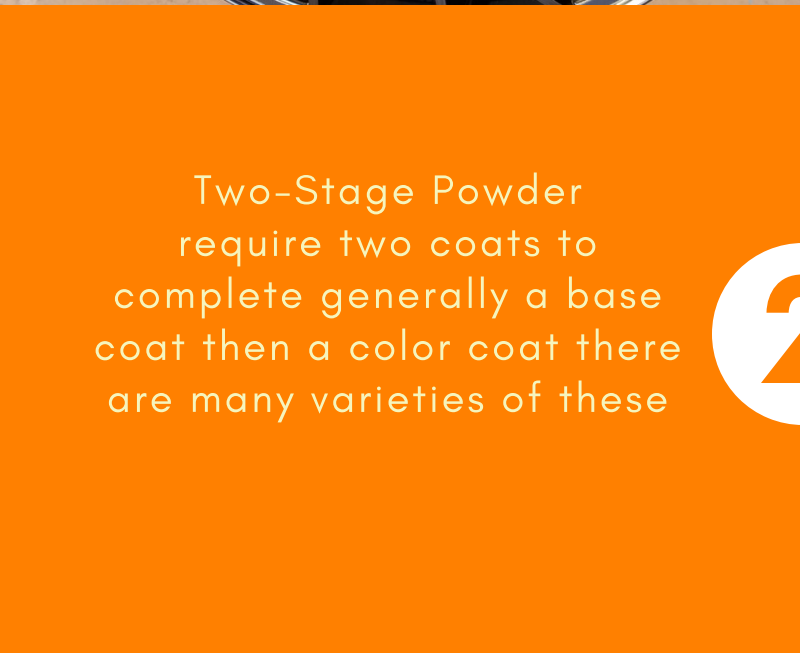

Part 1

types of powders and their uses for desired effects in powder coating

1

Single Stage Powders generally only require one coat or baking cycle

Two-Stage Powder require two coats to complete generally a base coat then a color coat there are many varieties of these

2

3

Sheens & Finishes Powders come in matte, satin, semi-gloss, and super mirror with some variances based within powder manufacturers

Wets and Clears are mostly two-stage applied as the second coat over any color to achieve that wet look however some colors are now sold as single stage wet

4

5

Two-tone is an advanced technique where two colors are applied with delineated areas to achieve the desired two color effect
