

## TYPES OF

# Powder Applications

### Part 3

types of powders and their uses for desired effects in powder coating

1

Hammertones are ideal for hiding imperfections in metal although dimpled the finish is smooth and shiny

Textures are gritty like a smooth sandpaper they are also high hiding coming in different grades and sheens

2

3

Stone Finishes are grainy and flecked with multiple colors to create texture and dimension similar to pebbles

RAL Colors are a universal group of industrial colors available all are single stage colors many powder producers create their branded pallets from them

4

5

Pearls and Illusions are other types that have a high reflective or rainbow effect and can be found in a wide color range
